EXPERIENCE

Flutter Developer | 07/2023 - Current..
Upsquare Technologies, Ahmedabad
- Improved and corrected existing software and system applications.
- Conducted API integration tests between different components of the application.
- Worked on creating UI and animations in Flutter.
- Performed version control activities using GIT repositories and collaborated with other developers in resolving merge conflicts during branching and merging process .
- Work with local storage using Flutter..
- Work with a local database.
- Work with Flutter Web - created a demo for calling from the web using Plivo.

PROJECTS

Voice Recorder
Upsquare Technologies.
- Contributed to the development of a Voice Recorder application, enabling users to record, save, and manage audio files on their devices.
- Implemented core features such as audio playback, trimming, merging, format conversion, and sharing options for a seamless user experience.
- Utilized Hive database for efficient data storage and retrieval, ensuring smooth performance and quick access to saved audio files.
- Focused on optimizing the app's functionality to enhance usability and audio management flexibility.

Lab Manager - Flutter
Collage Project
- Developed a Lab Manager application for tracking and managing computer faults in a lab environment.
- Enabled lab managers to view fault status of each computer, streamlining fault detection and maintenance.
- Implemented features to log fault reports, track repairs, and monitor computer availability.
- Enhanced lab efficiency by reducing downtime through quick identification and resolution of faulty computers.
- Utilized Firebase to build a user-friendly interface and robust backend system.
